

JOB OFFER

Position in the project:	Senior Engineer
Scientific discipline:	Physics (optics, biophotonics)
Job type (employment contract/stipend):	Employment contract
Number of job offers:	1
Remuneration/stipend amount/month (*X0 000 PLN of full remuneration cost, i.e. expected net salary at X 000 PLN*):	13 000 PLN - monthly gross salary
Position starts on:	1 October 2017
Maximum period of contract/stipend agreement:	3 years
Institution:	Institute of Physical Chemistry, Polish Academy of Sciences
Project leader:	Prof. dr hab. Maciej Wojtkowski
Project title:	<i>Two photon vision and two photon eye imaging (2x2 PhotonVis)</i> <i>Project is carried out within the TEAM-TECH programme of the Foundation for Polish Science.</i>
Project description:	The general concept of this proposal is directed towards the development of novel in vivo imaging modalities, dedicated to functional retinal screening utilizing two-photon absorption process. The vision directly depends on the state of active pigments present in photoreceptors and retinal pigmented epithelial cells. The active pigments are accessible via two-photon absorption process – either by measuring intensity attenuation or by two-photon excited fluorescence. By using these approaches, we have already demonstrated that humans can perceive Near Infrared radiation due to two-photon isomerization of rhodopsin chromophores. In the first part of this project, we will exploit this phenomenon and introduce objective and functional testing of the human retina based on two-photon absorption measurement. In the second part, we will focus on delivery of short light pulses to retinal pigmented epithelial cells to improve sensitivity of two-photon excited fluorescence imaging in rodent eyes.
Key responsibilities include:	<ol style="list-style-type: none"> 1. Management of technical part of the project; 2. Construction and optimization of new femtosecond fiber laser; 3. Adaptation of new light sources to two-photon vision and two-photon imaging systems; 4. Responsibility for communication with industrial partners.
Profile of candidates/requirements:	<ol style="list-style-type: none"> 1. MSc in physics (optics) or optical engineering; 2. Expertise in optical engineering with track record in construction of optical devices, e.g. short pulse lasers (femtosecond lasers); 3. Proficiency in English; 4. PhD degree (optional).
Required documents:	<ol style="list-style-type: none"> 1. A job application; 2. Curriculum vitae; 3. A list of publications, patent applications and/or research projects (if applicable); 4. At least one recommendation letter.

We offer:	<ul style="list-style-type: none"> • Long term contract (3 years supported by TEAM-TECH grant); • Interesting and challenging work in a young team led by a world-class scientist, prof. Maciej Wojtkowski - physicist specializing in optics applications in biology and medicine; • Opportunity to work in interdisciplinary research department on research projects with international coverage and in collaboration with industrial partners; • Competitive salary; • Ability to implement own ideas and solutions; • Participation in external trainings and international conferences; • Friendly atmosphere at work.
Please submit the following documents to:	mwojtkowski@ichf.edu.pl and apawlus@ichf.edu.pl (contact person for employment)
Application deadline:	<p>20 September 2017</p> <p>Kindly specify in the application topic: Application for Senior Engineer position – TEAM TECH project</p> <p>Successful candidates fulfilling the main assessment criteria will be invited for an interview. One candidate will be chosen. The competition results shall be announced by 27 September 2017.</p>
